The BPI Invest Balanced Fund is suitable for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon at least five (5) years

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

<b>Interest Rate Risk:</b>	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
<b>Equity Price Risk:</b>	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
<b>Liquidity Risk:</b>	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
<b>Related Party Risk:</b>	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
<b>Credit/ Default Risk:</b>	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

## OUTLOOK AND STRATEGY

**Market Review.** The local equities market sank as another round of tighter quarantine measures clamps down on the country's economic recovery. The government reimposed the so-called "Modified Enhanced Community Quarantine" or MECQ for two weeks in August in response to the medical community's plea brought about by mounting cases of COVID-19, particularly in Metro Manila. The Philippine Stock Exchange Index or PSEi declined by 0.75% to close at 5,884.18. The exchange also concluded the semi-annual review which saw the entry of Emperador in the bell-weather index, replacing Semirara. Volume was light at US\$168 million average daily turnover which was bloated by SM Group crosses. Foreign selling increased further at US\$261 million for the month.

Macroeconomic news for the month are as follows: 1) 2Q GDP sank by 16.5% Year-on Year, a historic low of a contraction. Sharp declines were seen in most segments. 2) Inflation rose to 2.7% in July brought about by increases in transport, alcohol and tobacco. 3) Bangko Sentral ng Pilipinas (BSP) maintained key policy rates, citing a within-range inflation and an improvement in domestic economic activity.

In terms of individual stock performance, the main advancers were RRHI (+13.52%), DMC (+12.68%) and URC (+12.58%). Meanwhile the biggest decliners were ALI (-13.51%), FGEN (-9.65%) and GTCAP (-8.88%).

In the local economic space, July inflation came in at 2.7% year-on-year, above market expectations of 2.5% and continuing to rise from June's 2.5% figure. The increase was mainly due to a rise in oil prices, which drove transportation and other related prices higher. Risk sentiment was driven by local developments in the COVID-19 pandemic, with the reimposition of stricter local quarantine measures in the country's economic center in the first half of the month dampening risk appetites across the local allocation universe. The release of lower than expected second-quarter GDP (-16.5% year-on-year versus expectations of -9.4%) and poor company second-quarter earnings also drove asset prices lower. In comments made over the course of the month, Bangko Sentral ng Pilipinas (BSP) Governor Diokno suggested a pause to monetary policy cuts by the central bank, and called for fiscal policy to take up the stimulative role played by monetary policy over the first half of the year.

**Fund Performance.** The fund returned -0.16% in August, outperforming its benchmark by 14 basis points. Year-to-date, it underperformed the benchmark by 33 basis points with a return of -11.91%.

**Fund Strategy.** We will continue to adopt a defensive stance on the view of a slower economic recovery. We will be selective in buying names on market dips but the preference is on large quality names – those that will be resilient during this pandemic.
