OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange (PSEi) took a huge hit in July, dropping by 9.20% to 6,270.23 on fears of another wave of COVID-19 sparked by the rising delta variant cases. Credit rating agency, Fitch, maintained the country's BBB rating but revised the outlook from stable to "negative" also weighed-in on investor concerns. Volume was thinner for July with Average Daily Turnover at US\$117 million or 19.3% lower month-on-month. Foreigners were net sellers yet again, registering at US\$184.5 million for the month.

In terms of individual stock performances, main advancers were: EMP (+9.22%), and GLO (+1.09%); while the main laggards include: LTG (-24.26%), MEG (-14.24%) and SMPH (-13.04%).

In the local economic space, June inflation fell to 4.1% year-on-year, compared to May's 4.5% and lower than the median forecast. Though it declined, the figure marks another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Bloated pork prices persisted due to the ongoing supply pressures brought about by the African Swine Fever outbreak. Meanwhile, transport costs eased due to base effects from last year. The BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability..

Fund Performance. The fund returned -5.05% in July, outperforming its benchmark by 45 basis points. Year-to-date, it underperformed the benchmark by 69 basis points with a return of -6.47%.

Fund Strategy. We anticipate further volatility due to threat of the rising delta variant. Despite this, we are still strategic long-term buyers of Philippine equities. We favor quality names or position on cyclicals. We will continue to be nimble and buy on market dips.

For the fixed income portion of the fund, we continue to favor the safety of time deposits and short term securities. Expectations of continued accommodative monetary policy may depress rates in the near term.
