KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

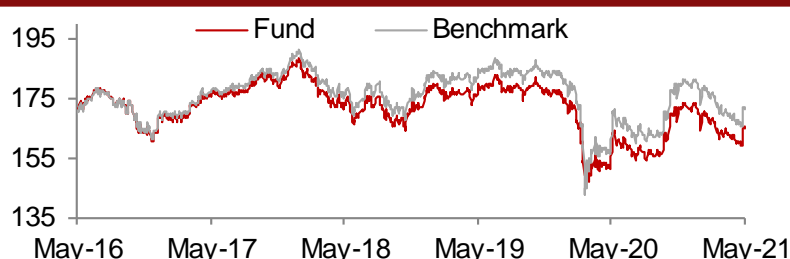

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEI) managed to surprise this month, rising by 4% to 6,628.49 in May. For the period, the bell-wether index plunged by 3% to as low as 6,164.89 which clearly testing the psychological support of 6,100 before suddenly skyrocketing to as high as 6,674.51.

Market optimism was spurred by the pandemic situation in the country which seem to be gradually improving – Covid19 cases are lower in terms of 7 day average (around 6k from the peak of 11k), hospital occupancy is getting lower and vaccination rate is increasing. The government then decided to loosen up on its quarantine restrictions, allowing some sectors to reopen. Market also cheered on the news that credit rating agency, S&P Global Rating, affirmed the “stable” outlook on the Philippine economy.

Moreover, the market has countered/discounted the anticipated outflow from an index rebalancing from MSCI where an estimated of US\$258 million were expected to be sold off.

Volume was light yet again, down 26.1% to US\$145 million in May. In terms of foreign activity, foreign outflows still dominated for the month, registering at US\$240 million. On a year-to-date basis, net foreign outflow has stretched to US\$1.465 billion.

Macroeconomic news for the month include: 1) Inflation (CPI) recorded at 4.5% in April, the same print registered in March. This is lower than consensus forecast of 4.7%. Food inflation decelerated despite an increase in meat while transport inflation rose. 2) The Bangko Sentral ng Pilipinas (BSP) decided to keep overnight policy rates at 2%, in-line with consensus expectations. 3) Remittances from Overseas Filipino Workers (OFWs) recorded at US\$2.51 billion in March or 4.9% higher year-on-year. Land-based OFW remittances were at US\$1.9 billion or 5% year-on-year while sea-based registered at US\$566 million or 4.5% year-on-year.

In terms of individual stock performances, main advancers were: AEV (+13.66%), GTCAP (+12.38%) and ICT (+10.16%); while the main laggards were: FGEN (-4.50%), MEG (-3.49%) and RRHI (-2.10%).

In the local economic space, April inflation came in at 4.5% year-on-year, unchanged from March and slightly lower than the median forecast of 4.7%. For the first four months of the year, inflation averaged at 4.5%, higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. However, the BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. Meanwhile, the country's 1st quarter GDP growth posted at 4.2% decline YoY, worse than analysts' expectations. The decline was led by falling consumer and government spending, as well as slower industrial and agricultural production. With the economy still in need of support and inflation deemed manageable, the BSP kept policy rates unchanged during its meeting held mid-May. BSP Governor Benjamin Diokno reiterated that the central bank would continue to utilize its full arsenal of tools to support the economy.

Fund Performance. The fund returned 2.16% in May, outperforming its benchmark by 7 basis points. Year-to-date, it underperformed the benchmark by 51 basis points with a return of -3.79%.

Fund Strategy. We are weighted in Philippine Equities and remain to be strategic long-term buyers pinning on a delayed recovery until 2023. In the meantime, we will ride out the potential stability of foreign flows that are seeking laggards. We will continue to remain nimble and buy on market dips.

For the fixed income portion of the fund, we continue to favor the safety of time deposits and short term securities. Expectations of continued accommodative monetary policy may depress rates in the near term.
