OUTLOOK AND STRATEGY

Market Review. Global equity markets finished March up 2.7% as new fiscal support was approved in the US and the economic reopening progressed globally. A \$1.9 trillion COVID-19 relief plan was approved by congress and signed by President Biden, authorizing a flurry of new federal spending. Interest rates increased as did inflation concerns. Markets are anticipating a sharp economic rebound, accommodative central banks, global appetite for infrastructure and the impact from stimulus payments. In March, the technology sector underperformed broader equity markets. The CEOs of Facebook, Google and Twitter testified before Congress on misinformation and extremism online. China's anti-trust regulator continued a crackdown on the country's tech giants. Fines were imposed on 12 companies, including Tencent and Baidu, for anti-competitive deals made in the past. Volkswagen detailed their plan to become the number 1 global provider of electric vehicles by 2025.

Fund Performance. The fund returned -5.33% in March. Security selection within internet had the largest positive effect on relative returns. Overweight in internet and security selection within software detracted from performance.

Fund Strategy. The fund will continue to focus on long-term secular themes, many of which are experiencing increased demand as global enterprises push for modernization and digitalization, while also taking advantage of attractive valuations of cyclical names which are expected to benefit as the market recovers. The fund will maintain its exposure to trends whose pace of adoption have accelerated due to social distance and migration to remote work, such as cloud computing, e-commerce and gaming.
