OUTLOOK AND STRATEGY

Market Review. The local equities market sank as another round of tighter quarantine measures clamps down on the country's economic recovery. The government reimposed the so-called "Modified Enhanced Community Quarantine" or MECQ for two weeks in August in response to the medical community's plea brought about by mounting cases of COVID-19, particularly in Metro Manila. The Philippine Stock Exchange Index or PSEi declined by 0.75% to close at 5,884.18. The exchange also concluded the semi-annual review which saw the entry of Emperador in the bell-weather index, replacing Semirara. Volume was light at US\$168 million average daily turnover which was bloated by SM Group crosses. Foreign selling increased further at US\$261 million for the month.

Macroeconomic news for the month are as follows: 1) 2Q GDP sank by 16.5% Year-on Year, a historic low of a contraction. Sharp declines were seen in most segments. 2) Inflation rose to 2.7% in July brought about by increases in transport, alcohol and tobacco. 3) Bangko Sentral ng Pilipinas (BSP) maintained key policy rates, citing a within-range inflation and an improvement in domestic economic activity.

In terms of individual stock performance, the main advancers were RRHI (+13.52%), DMC (+12.68%) and URC (+12.58%). Meanwhile the biggest decliners were ALI (-13.51%), FGEN (-9.65%) and GTCAP (-8.88%).

Fund Performance. The fund underperformed its benchmark by 45 basis points in August with a return of -1.20%.

Fund Strategy. We will continue to adopt a defensive stance on the view of a slower economic recovery. We will be selective in buying names on market dips but the preference is on large quality names – those that will be resilient during this pandemic.
