OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index declined by 0.26% in July as yields rose by 8.7 basis points on average. Peso-denominated government bonds were more actively traded on this month compared to that of June, averaging Php 6.86 billion per day. Trades were mostly observed on securities along the belly of the yield curve, such as the RTB3-8, RTB3-9, FXTN 5-11 and FXTN 5-75.

All three FXTN auctions scheduled for the month were fully rejected, given investors demand for higher yields on the longer-tenored securities being issued by the Bureau of the Treasury (BTr). Had the 10-Yr, 7-Yr and 20-Yr FXTNs been fully awarded by the BTr, yields would have risen to 6.842%, 6.621% and 7.39%, respectively.

Inflation for the month of June went up to 5.2% (using 2012 as the base year), 0.6% higher than the figure posted in May. This figure exceeded the 4.3% to 5.1% expectation of the Bangko Sentral ng Pilipinas (BSP). The increase in consumer prices continued to be driven by rising costs in food, drinks and tobacco. After the release of the inflation figure, the BSP continued to assure investors that they would vigilantly monitor economic data so as to determine the appropriate monetary policy response moving forward. During a separate press release in mid-July, the BSP stated that the government will be considering strong follow-through monetary adjustments at their next meeting. The BSP also announced that they will stop further reserve requirement cuts for the year. The Monetary Board will meet on August 9 following the release of the July inflation data on August 7.

Fund Performance. The Fund outperformed its benchmark by 29 bps in July.

Fund Strategy. The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
