## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index fell by 1.44% in October as yields jumped by 74 basis points on average. Peso-denominated government bonds were less actively traded this month compared to August, averaging Php 6.5 billion per day. Trades were mostly observed on the shorter end of the yield curve.

Both FXTN auctions scheduled for the month were met with lukewarm demand, given investors' continued preference for shorter-tenored securities. The first auction, a re-issuance of the 5-year FXTN 5-75 (coupon of 5.250%), was only partially accepted. Average yield was at 7.341%, 144 basis points higher than the last awarded FXTN5-75 issuance in August. The auction was slightly oversubscribed at Php15.73 billion, compared to the Php15.00 billion initial offer. The second auction, a reissuance of the 7-year FXTN 7-61 (coupon of 5.75%), was fully rejected. Had bids been awarded, the average yield would have risen to 8.284% from 7.085% in a similar auction last September.

Inflation for the month of September surged to a 9-year high of 6.7%, higher than the 6.4% posted in August. The uptrend was largely due to price increases in food and non-alcoholic beverages. The alcoholic beverages and tobacco category likewise posted a double-digit annual increase. Persistently high inflation has kept local market players erring on the side of caution, especially with the Bangko Sentral ng Pilipinas (BSP) retaining a hawkish tone amid rising price pressures. The BSP has its raised policy rates by 150 basis points in total since the beginning of the year. Monetary authorities will continue to vigilantly monitor economic data so as to determine the appropriate policy response moving forward.

**Fund Performance.** The Fund underperformed its benchmark by 55 bps in October.

**Fund Strategy.** The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
