INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve for its participants liquidity and stable income derived from a diversified portfolio of primarily short-term fixed income instruments. The Fund aims to provide returns in excess of the return of the 91-day Philippine Treasury Bill.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI PERA Money Market Fund is suitable only for investors who:

- Are classified as moderate based on their risk profile
- Have an investment horizon of at least three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors / events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Possibility to experience losses due to the fund's inability to convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

Related Party Risk: Risk of any actual or potential conflicts of interest in handling of related party transactions.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.12% in August, with money market benchmark yields falling an average of 14 basis points (bps).

The Bureau of the Treasury (BTr) sold six tranches of Treasury Bills (T-bills) in August: four sets of 91-, 182-, and 364-day securities, and two tranches of 35-day securities. Demand for T-bills fell as the month wore on, but all auctions were awarded in full. Between their first and last auctions in the month, 91-day yields fell 10 bps, 182-day yields fell 5 bps, and 35- and 364-day yields were flat. All auctions were fully awarded; the 35-, 91-, 182-, and 364-day securities were priced at average yields of 1.163%, 1.131%, 1.407%, and 1.751%, respectively, in their last auctions of the month. Additionally, mid-month, the BTr issued a new 5-year retail treasury bond, RTB5-13. The issuance was one of the largest local single-security issuances in history; with the BTr raising PHP516.31 bn from the offering, awarded at a yield of 2.625%.

In the local economic space, July inflation came in at 2.7% year-on-year, above market expectations of 2.5% and continuing to rise from June's 2.5% figure. The increase was mainly due to a rise in oil prices, which drove transportation and other related prices higher. Risk sentiment was driven by local developments in the COVID-19 pandemic, with the reimposition of stricter local quarantine measures in the country's economic center in the first half of the month dampening risk appetites across the local allocation universe. The release of lower than expected second-quarter GDP (-16.5% year-on-year versus expectations of -9.4%) and poor company second-quarter earnings also drove asset prices lower. In comments made over the course of the month, Bangko Sentral ng Pilipinas (BSP) Governor Diokno suggested a pause to monetary policy cuts by the central bank, and called for fiscal policy to take up the stimulative role played by monetary policy over the first half of the year.

Fund Performance. The Fund returned 0.00% during the month, below its benchmark by 8 basis points.

Fund Strategy. The Fund favors the safety of Time Deposits. Expectations of monetary easing moving forward may depress short-term rates
