- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.19% for the month of August with benchmark government yields flat, rising an average of 1 basis point (bp). The yield curve flattened, with benchmark yields in the long end of the curve falling with greater magnitude than the coincident increase in short-term benchmark yields. Daily trading volumes rose to PHP29.4bn, with the new 5-year RTB5-13 and 10-year FXTN10-65 securities seeing the highest trading volumes over the month.

The Bureau of the Treasury (BTr) held two FXTN auctions in August, with PHP30bn on offer for each of the new 10-year FXTN10-65 security, first issued in July, and a reissuance of the 13-year FXTN20-20. The reissuance of FXTN10-65 saw moderate demand, with bids totaling PHP54.73bn, and was fully awarded at an average yield of 2.724%—3bps lower than the average yield it was awarded in its July issuance, with a PHP10-bn tap opened and fully awarded in the afternoon of the auction. However, the second auction saw all bids for the FXTN20-20 reissuance rejected, despite receiving PHP46.92bn-worth of bids. Additionally, mid-month, the BTr issued a new 5-year retail treasury bond, RTB5-13. The issuance was one of the largest local single-security issuances; with the BTr raising PHP516.31bn from the offering, awarded at a yield of 2.625%.

In the local economic space, July inflation came in at 2.7% year-on-year, above market expectations of 2.5% and continuing to rise from June's 2.5% figure. The increase was mainly due to a rise in oil prices, which drove transportation and other related prices higher. Risk sentiment was driven by local developments in the COVID-19 pandemic, with the reimposition of stricter local quarantine measures in the country's economic center in the first half of the month dampening risk appetites across the local allocation universe. The release of lower than expected second-quarter GDP (-16.5% year-on-year versus expectations of -9.4%) and poor company second-quarter earnings also drove asset prices lower. In comments made over the course of the month, Bangko Sentral ng Pilipinas (BSP) Governor Diokno suggested a pause to monetary policy cuts by the central bank, and called for fiscal policy to take up the stimulative role played by monetary policy over the first half of the year.

Fund Performance. The Fund outperformed its benchmark by 12 basis points, returning 0.31% for the month.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of slightly accelerating local inflation amid recovering oil prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
