OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.12% in August, with money market benchmark yields falling an average of 14 basis points (bps).

The Bureau of the Treasury (BTr) sold six tranches of Treasury Bills (T-bills) in August: four sets of 91-, 182-, and 364-day securities, and two tranches of 35-day securities. Demand for T-bills fell as the month wore on, but all auctions were awarded in full. Between their first and last auctions in the month, 91-day yields fell 10 bps, 182-day yields fell 5 bps, and 35- and 364-day yields were flat. All auctions were fully awarded; the 35-, 91-, 182-, and 364-day securities were priced at average yields of 1.163%, 1.131%, 1.407%, and 1.751%, respectively, in their last auctions of the month. Additionally, mid-month, the BTr issued a new 5-year retail treasury bond, RTB5-13. The issuance was one of the largest local single- security issuances in history; with the BTr raising PHP516.31 bn from the offering, awarded at a yield of 2.625%.

In the local economic space, July inflation came in at 2.7% year-on-year, above market expectations of 2.5% and continuing to rise from June's 2.5% figure. The increase was mainly due to a rise in oil prices, which drove transportation and other related prices higher. Risk sentiment was driven by local developments in the COVID-19 pandemic, with the reimposition of stricter local quarantine measures in the country's economic center in the first half of the month dampening risk appetites across the local allocation universe. The release of lower than expected second-quarter GDP (-16.5% year-on-year versus expectations of -9.4%) and poor company second-quarter earnings also drove asset prices lower. In comments made over the course of the month, Bangko Sentral ng Pilipinas (BSP) Governor Diokno suggested a pause to monetary policy cuts by the central bank, and called for fiscal policy to take up the stimulative role played by monetary policy over the first half of the year.

Fund Performance. The Fund returned 0.12% during the month, above its benchmark by 0.04%.

Fund Strategy. The Fund favors the safety of Time Deposits. Expectations of monetary easing moving forward may depress short-term rates.
