The BPI Invest Philippine Dollar Bond Index Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines rallied 1.11% in February as Philippine dollar-denominated bond yields fell by an average of 18 basis points across the curve, mostly on the long-end.

The US Treasury yield curve flattened as market players anxiously monitored developments on the coronavirus (COVID-19) outbreak. While cases had been isolated mostly to China at the latter part of January, fears of contagion further heightened as new patients were diagnosed in various countries across the globe, including Japan, South Korea and Italy. Consequently, analysts recalibrated their yearly growth forecasts, taking into account lower consumer spending and overall output globally. The International Monetary Fund (IMF) slashed its China GDP growth outlook from 6.0% to 5.6% in 2020, the lowest figure since 1990. It likewise stated that global growth would likely see expansion at about 0.1% lower than initially expected. As a result of widespread concerns on the effects of the virus on global output and growth, the US 10-year benchmark yield fell 36 basis points for the month, closing at a year-to-date low of 1.15%.

In the local economic space, inflation for the month of January averaged 2.9% year-on-year (versus market expectations of 2.7%). A decline in rice prices was more than offset by a rise in fish and gas prices. Despite the mildly negative inflation surprise, yields were driven downward by a sharp decline in global risk appetite due to the international spread of the COVID-19 and its potential effects on the global supply chain, tourism, and aggregate demand for goods and services. Amid falling local and international growth expectations and within-target inflation, the Bangko Sentral ng Pilipinas (BSP) cut its benchmark policy rate by 25 bps to support market confidence. In a statement made at the end of the month, BSP Governor Benjamin Diokno kept the door open for more policy easing, highlighting his concerns about the impact of the escalating viral outbreak on local economic growth.

Fund Performance. The fund returned 1.00% for the month, behind its benchmark index by 11 basis points.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
