KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines marginally rose by 0.68% in June as Philippine dollar-denominated bond yields mimicked the slight gains in US Treasuries.

Vaccine rollouts continued to gain momentum in June with some of the more successful countries making headway on reopening their economies. However, it was the FOMC (Federal Open Market Committee) meeting that took center stage in terms of new developments. During its scheduled meeting, the Federal Reserve (the Fed) made upward revisions to its inflation and economic growth projections, while simultaneously unveiling two unexpected 2023 rate hike projections in their updated Fed "dot plot" (used to show where the Fed members think rates will be in the next few years). The US Treasury yield curve flattened in response, with yields on the short-end of the curve rising sharply while the long-end fell slightly. Nevertheless, commentary from various Fed members during the month, particularly Fed Chair Jerome Powell, attempted to calm market somewhat by stating that recovery was still some ways away and that any changes to their existing asset purchases would be "orderly, methodical and transparent". For the month, the 10-year US Treasury benchmark yield fell by 12 basis points to end the month at the 1.47% level.

In the local economic space, May inflation came in at 4.5% year-on-year, unchanged from April and in-line with the median forecast. This marked the 5th straight month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Bloated pork prices due to the African Swine Fever outbreak kept the food prices overall elevated. Transport costs likewise remained high due to global fuel prices. However, the BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. Consequently, the central bank maintained its policy rates at the current record lows during its Monetary Policy meeting concluded last June 24. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability.

Fund Performance. The fund returned 0.80% in May, outperforming its benchmark by 12 basis points. Year-to-date, it outperformed the benchmark by 8 basis points with a return of -0.38%.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:
