KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines fell 0.40% in March as Philippine dollar-denominated bond yields tracked the sell-off in US Treasuries.

Global bond prices fell amid expectations of a swifter economic recovery and higher inflation as vaccines continued to be rolled out worldwide. US stimulus in the form of a US\$1.9 trillion fiscal package boosted investor sentiment which drove demand for risk assets. Recent Purchasing Managers' Index (PMI) data likewise revealed expanding manufacturing activity in many parts of the world. In the US, the services sector saw a significant increase in activity as the services PMI registered at 58.9, well above expectations. Meanwhile, China's economy slowed slightly in February as PMIs decreased, though this could be due to lengthy business closures during the Lunar New Year holiday. Various data released throughout the month painted a rosier picture of the global economic recovery overall. Consequently, the 10-year US Treasury benchmark yield rose 34 basis points to close at the 1.74% level.

In the local economic space, February inflation accelerated to 4.7% year-on-year, quickening from January's 4.2% figure and marking the 5th straight monthly increase. The rise was mainly attributed to food and non-alcoholic beverage prices, as the cost of meat spiked by 20%. Transport prices also contributed, as global oil prices saw an 18% increase. Meanwhile, local coronavirus (COVID) infections spiked to as much as 10,000 new cases per day, which prompted President Duterte to announce yet another lockdown ahead of the Holy Week long weekend. With uncertainty regarding growth and inflation likely to persist, the Bangko Sentral ng Pilipinas (BSP) kept its policy rates steady once more. BSP Governor Benjamin Diokno assured the public by reiterating that they were ready to address rising inflation pressures should any spillover effect begin to manifest.

Fund Performance. The fund returned -0.34% for the month, ahead of its benchmark index by 0.06%.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
