KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines marginally rose by 0.60% in May as Philippine dollar-denominated bond yields mimicked the slight gains in US Treasuries.

Global risk assets rallied in May as US economic data—specifically growth and inflation—surprised to the upside, and global vaccine rollouts continued at a more accelerated pace. US headline inflation rose 4.2% YoY (year-on-year) and 0.8% MoM (month-on-month) well ahead of expectations, while the Purchasing Managers' Indices (PMI) for both manufacturing and services rose to their highest levels on record. These reports emphasized that consumer demand was firming up. With mounting concerns that the Fed may just begin to think about tapering its bond purchases, bonds were sold off mid-month. However, recently released minutes of the Federal Reserve meeting held last April reported that the central bank maintained its view of a slow economic recovery which somewhat assuaged fears that the Fed would no longer be accommodative. For the month, the 10-year US Treasury benchmark yield rose to as much as 1.69% before ending the month broadly unchanged at the 1.59% level.

In the local economic space, April inflation came in at 4.5% year-on-year, unchanged from March and slightly lower than the median forecast of 4.7%. For the first four months of the year, inflation averaged at 4.5%, higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. However, the BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. Meanwhile, the country's 1st quarter GDP growth posted a 4.2% decline YoY, worse than analysts' expectations. The decline was led by falling consumer and government spending, as well as slower industrial and agricultural production. With the economy still in need of support and inflation deemed manageable, the BSP kept policy rates unchanged during its meeting held mid-May. BSP Governor Benjamin Diokno reiterated that the central bank would continue to utilize its full arsenal of tools to support growth and stability.

Fund Performance. The fund returned 0.50% in May, underperforming its benchmark by 13 basis points. Year-to-date, it underperformed the benchmark by 19 basis points with a return of -1.71%.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS
