## OUTLOOK AND STRATEGY

**Market Review.** The JP Morgan Asia Credit Index (JACI) Philippines rose by 0.56% in August as Philippine dollar-denominated bond yields moved lower by an average of 8 basis points across the curve.

The US monetary policy rate was held steady in August as the Federal Reserve appeared to be decisive with their gradual 25-basis point quarterly pace of rate increases. US Treasury yields fell for the month as risk-off sentiment prevailed with renewed tensions between Turkey and the US, as well as the deterioration of trade talks between the US and China. As a result, the US 10-year benchmark yield fell 10 basis points month on month, closing at the 2.86% level. Philippine dollar-denominated asset prices mimicked the upward price movements of the US Treasury for the month.

On the local front, inflation for the month of July climbed further to 5.7% (using 2012 as the base year), higher than the 5.2% posted in June and exceeding the consensus estimate of 5.5%. This figure was also towards the upper limit of the BSP's projected inflation range of 5.1%-5.8%. The rise in consumer prices continued to be driven by rising costs in food and non-alcoholic beverages. In other news, the country's GDP grew by 6.0% YoY for 2Q18, missing the consensus estimate of +6.6% YoY. Economic growth was driven by a surge in investment spending, while expansion in private consumption disappointed. The net exports figure weighed on growth as imports significantly increased during the quarter. The BSP Monetary Board meeting held within the month concluded with a 50 basis point interest rate hike as expected by the market. However, the central bank assured investors that they would vigilantly monitor economic data so as to determine the appropriate monetary policy response moving forward.

**Fund Performance.** The fund returned 0.49% for the month, underperforming its benchmark by 7 basis points.

**Fund Strategy.** The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
