The BPI Fixed Income Portfolio Fund-of-Funds is suitable only for investors who:

- Are classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The Fund invests in an long term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

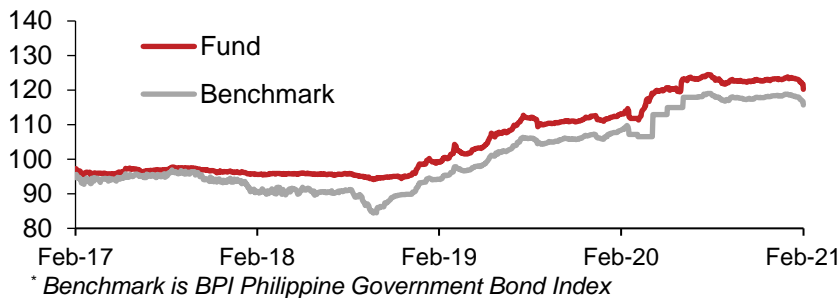

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -2.48% in February, with benchmark government yields rising 57 basis points (bps) on average. The curvature of the yield curve increased, with benchmark yields in the belly rising with a greater magnitude than the rise in short- and long-term. Average daily trading volume fell to PHP23.4bn from January's PHP39.2bn, with the 4.5-year RTB5-13 and 9.4-year FXTN10-65 securities seeing the highest volumes over the month.

The Bureau of the Treasury (BTr) held two auctions in February. The first was a PHP30-bn reissuance of the 9.4-year security FXTN10-65 (first issued in July 2020); the second was the pricing auction for the March issuance of a new 3-year Retail Treasury Bond, RTB3-11. FXTN10-65 saw total bids of PHP63.05bn and was fully awarded at an average yield of 3.066%. Meanwhile, bids for the new RTB3-11 totaled PHP284.18bn, and the BTr accepted a total of PHP221.22bn worth of bids, awarded at an average yield of 2.375%. The RTB's offer period continues until its March 9 issuance.

In the local economic space, January inflation came in at 4.2% year-on-year, above expectations of 3.5% and quickening from December's 3.5% figure. Food inflation due to supply chain and logistical issues and higher transportation costs due to rising oil prices were the main drivers of the headline figure's increase. Meanwhile, President Duterte rejected calls to loosen quarantine restrictions, citing his desire for more widespread vaccination before easing restrictions. With spiking inflation and slow economic growth continuing to dampen risk sentiment, the Bangko Sentral ng Pilipinas (BSP) kept policy rates steady in its February meeting but raised its full-year 2021 inflation forecast to 4% from its previous forecast of 3.2%. In statements made throughout the month, BSP Governor Benjamin Diokno stated that the spike in inflation was transitory and was being dealt with through non-monetary measures, and suggested that policy rates would remain at current levels until at least the end of the first half of the year.

Fund Performance. The Fund returned -2.71% for the month, underperforming the benchmark by 23 bps.

Fund Strategy. For BPI FIPFOF, fund strategy to maintain its underweight duration position relative to the BPI Government Bond Index on the back of higher inflation expectations and additional bond supply which may push rates higher.
