The BPI Fixed Income Portfolio Fund-of-Funds is suitable only for investors who:

- Are classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The Fund invests in an long term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.50% in July, with benchmark government yields dropping 5.47 basis points (bps) on average. The yield curve flattened, with rates on the short-end of the curve rising while yields on the belly and long-end of the curve declined. Average daily trading volume fell to PHP20.60bn from June's PHP27.99bn with trades were mostly seen on the short-end (Treasury Bills) and belly (3 to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (20-, 10- and 2 11.7-year tenors) and four Treasury Bill auctions in June. Demand was quite healthy across all four FXTNs, with bid volumes considerably higher than offered amounts. However, reception to the BTr's tap offerings were luke-warm to mixed. There were 2 newly issued papers last month, the partially awarded 20-year FXTN20-24 (coupon of 5.125% with average yield of 5.085%) and the fully awarded 10-year FXTN10-66 (coupon of 4.000% with average yield of 3.920%). Meanwhile, average yields for the twice reissued FXTN7-64 were awarded at 3.576% and 3.651%, respectively. Towards month-end, the BTr released its August auction schedule, announcing four weekly FXTN issuances (10-, 7-, 20-, and 11-year tenors) and four weekly Tbill auctions.

In the local economic space, June inflation fell to 4.1% year-on-year, compared to May's 4.5% and lower than the median forecast. Though it declined, the figure marks another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Bloated pork prices persisted due to the ongoing supply pressures brought about by the African Swine Fever outbreak. Meanwhile, transport costs eased due to base effects from last year. The BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability.

Fund Performance. The Fund returned 0.16% for the month, below the benchmark by 34 bps.

Fund Strategy. For BPI FIPFOF, fund strategy to maintain its underweight duration position relative to the BPI Government Bond Index on the back of higher inflation expectations and additional bond supply which may push rates higher.
