## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned -1.63% in March, with benchmark government yields rising 43 basis points (bps) on average. The yield curve steepened, with rates in the belly and long-end of the curve rising with a greater magnitude than the rise in short-term yields. Average daily trading volume fell to PHP18.66bn from February's PHP23.4bn, with the 4.5-year RTB5-13 and the newly issued RTB3-11 seeing strong trading volumes over the month.

The Bureau of the Treasury (BTr) held two FXTN auctions and five Treasury Bill auctions in March. The first FXTN auction was a PHP30-bn reissuance of the 7-year security FXTN10-61; the second was another PHP30-bn reissuance of the 10-year security FXTN10-65. Average yields awarded were at 3.732% and 4.614%, respectively, both higher than prior auctions of similar tenors. Market demand was quite strong for both with bids exceeding PHP50-bn each. Meanwhile, the Treasury Bills saw yields rising gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.269%, 1.609% and 1.926%, respectively, during the last auction of the month.

In the local economic space, February inflation accelerated to 4.7% year-on-year, quickening from January's 4.2% figure and marking the 5th straight monthly increase. The rise was mainly attributed to food and non-alcoholic beverage prices, as the cost of meat spiked by 20%. Transport prices also contributed, as global oil prices saw an 18% increase. Meanwhile, local coronavirus (COVID) infections spiked to as much as 10,000 new cases per day, which prompted President Duterte to announce yet another lockdown ahead of the Holy Week long weekend. With uncertainty regarding growth and inflation likely to persist, the Bangko Sentral ng Pilipinas (BSP) kept its policy rates steady once more. BSP Governor Benjamin Diokno assured the public by reiterating that they were ready to address rising inflation pressures should any spillover effect begin to manifest.

**Fund Performance.** The Fund returned -0.52% for the month, outperforming the benchmark by 111 bps.

**Fund Strategy.** For BPI FIPFOF, fund strategy to maintain its underweight duration position relative to the BPI Government Bond Index on the back of higher inflation expectations and additional bond supply which may push rates higher.
