## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index rose 1.02% in October, with yields of benchmark government securities falling an average of 11.6 basis points (bps), led by the belly of the curve. Daily trading volume was tepid, averaging PHP16.6bn, with the 5-year RTB5-12 and 7-year FXTN7-62 securities seeing the heaviest trading volumes over the month.

The Bureau of the Treasury (BTr) held three FXTN auctions in October: reissuances of FXTN3-24 and 7-62, and the issuance of a new 5-year bond, FXTN5-76. All three auctions saw strong demand and were fully awarded. The 3-year paper had an issue size of PHP20bn and was awarded at an average yield of 3.996%, three basis points higher than the yield it was awarded at in its last auction held in August; the 5-year issuance had a size of PHP20bn and was awarded at a coupon of 4.25%. Meanwhile, the 7-year paper had an issue size of PHP20bn and was awarded at an average yield of 4.322%, 18 bps lower than the yield it was awarded at in its last auction held in September; while the BTr subsequently opened a tap for an additional PHP20bn of the 7-year paper, only PHP1.774bn was tendered and nothing was awarded.

In the local space, inflation for the month of September came in slightly slower than market expectations, rising 0.9% year-on-year (vs. market expectations of 1.1%). The minimal increase for the month reflected the decline in the food basket due to lower rice prices, as well as lower global oil prices. With inflation for the year expected to settle within the BSP's 2-4% target range, and perhaps in response to weak second-quarter GDP data, the Bangko Sentral ng Pilipinas (BSP) announced a surprise 1% cut to banks' Reserve Requirement Ratios, to be effected in early December. Moving forward, monetary authorities will continue to vigilantly monitor economic data so as to determine an appropriate policy response.

**Fund Performance.** The Fund rose 0.60% in October, underperforming the benchmark by 42 bps.

**Fund Strategy.** The portfolio will maintain its underweight duration position as inflation is already seen to have bottomed out, and the BSP may pause in cutting rates, potentially limiting any further decline in yields.
