OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index fell by 1.15% in March as yields rose by an average of 12 basis points, with most of the increase seen on the 3-year and 10-year tenor buckets. Compared to last month, peso-denominated government bonds were more actively traded with an average daily volume of Php12.7 Bn. Trades were mostly seen on the liquid securities such as the 9-year FXTN 10-60, 15-year FXTN 20-17, and 5-year FXTN 5-74.

The continued rise in yields was seen during the two FXTN re-issuances held by the Bureau of the Treasury (BTR) in March. The average yield on the 3-year FXTN 3-22 rose to 3.873%, higher than its previous average yield of 3.492%. Even with the rise in yield, the auction experienced strong appetite with bids amounting to Php35.7 Bn versus its offer size of Php15 Bn. Likewise, the yield on the re-issuance of the 5-year FXTN 5-74 rose to 4.132%. The auction saw healthy demand with total bids amounting to Php26.6 Bn versus its offer size of Php15 Bn. Towards the end of the month, the BTR also issued its first 3-year Retail Treasury Bond (RTB 3-8) since 2009, awarded at 4.25% with an initial volume of 70Bn. Moreover, the BTR announced its borrowing schedule for the second quarter, with issuances amounting to a total of Php180 Bn across T-bills, 7-,10- and 20-year FXTNs.

February's local inflation figure came out better than expected at 3.3% and was within BSP's expected range of 3.1% to 3.9%. With the local inflation at 2014 high and the widely expected FED rate hike, BSP Governor Tetangco stated that there's no urgency to adjust the stance of the local monetary policy. Globally, the US Federal Reserve (FED), raised its interest rates after their FOMC meeting last March 15, 2017.

Fund Performance. The Fund underperformed its benchmark by 83 basis points.

Fund Strategy. The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
