Fund Manager's Report

Local equities remained strong in August, gaining 4.1% (3,566 PSE index level) amid flush liquidity and bullish investor sentiment. After a healthy round of second quarter earnings reports, demand for Philippine stocks continued to soar with foreign investors aggressively buying local stocks. Better-than-expected economic data further buoyed investor sentiment after reports showing Gross Domestic Product expanded at a surprising 7.9% during the second quarter, and beating market expectation of 6.3%. June OFW remittances continued to grow, reaching a record-high of US\$1.623 billion (+8.3% year-on-year). In terms of market performance, property stocks led the advance with the likes of Megaworld (+24%), Filinvest Land (+13.9%), and Ayala Land (+12%) ending as top gainers for the sector. Conglomerates likewise surged, with Lopez Holdings gaining 38.7% and Metro Pacific gaining 21.7%. Foreigners turned net buyers amounting to USD\$4.6 million for the month, after being net sellers the previous month.

In the near-term, momentum should continue to push stock prices upwards with the PSE index possibly testing its all-time high of 3,896. As such, we remain fully invested in equities with bias towards property, power and utilities, and select holding firms. Likewise, we continue to favor high-beta and mid cap stocks that have shown strong earnings growth.
