OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) ended the month lower, falling by 0.19% to 7,550. This was brought down mainly by overseas news highlighted by continued economic woes in Greece and China's slowdown. The PSEi's year-to-date gains are now cut down to 4.42%. Average daily volume for the month came out at Php6.81 billion, higher than the Php6.70 billion recorded in June. The local bourse also experienced another round of net foreign selling, amounting to US\$193 million in July. This has further dragged the year-to-date net foreign inflows to US\$216 million.

On the local front, politics was the main event after President Aquino delivered his last State of the Nation Address (SONA) and endorsed current Interior and Local Government Secretary, Mar Roxas, to the presidential elections next year. Meanwhile on the macroeconomic side, the Bangko Sentral ng Pilipinas (BSP) kept its benchmark policy rates unchanged. Inflation in June slid to 1.2% as housing and utilities costs declined.

Top stock gainers for the month include PCOR (+12.99%), BLOOM (+12.66%) and SMPH (+7.36%) while top laggards were SCC (-16.21%), DMCI (-9.85%) and BDO (-7.38%). In terms of sector, Services (+3.45%), Property (+2.60%) and Holdings (+0.29%) ended in green while the Mining and Oil (-12.17%), Financials (-3.83%) and Industrial (-0.68%) ended negatively.

Fund Performance. The fund fell by 0.30% in July, missing its benchmark by 29 basis points. It outperforms the benchmark on a year-to-date basis by 94 basis points with a return of 3.77%.

Fund Strategy. We will continue to adopt a defensive strategy in the coming weeks as global equity risk-off sentiment prevails. Value turnover will also taper off as foreign investors continue to re-assess asset allocation towards Emerging Markets. Expect market volatility in the days to come as the market prices in the actual Fed "lift-off ". On the domestic front, we will continue to pick up Philippine companies that have strong cash yields (telecoms and utilities) on any correction. Cash deployment should be optimal at the 7,400- support level as investors will continue to expect weak 2nd quarter results.
