OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) soared for the 3rd consecutive month on surging foreign inflows and on a slew of economic developments. The local boarse even touched the 8,000 mark before market players took profits, closing at 7,837.12 or 2.30% higher month-on-month. Volumes were relatively higher averaging Php7.9 billion daily vs Php 6.5 billion in the prior month.

On the local economic front, the 1Q GDP came out strong although lower than expected, registering at 6.4% vs 6.7% as it was coming off a high base (2016 was an election year). Also, the 1Q corporate earnings season concluded with most names coming out generally in-line with in-house estimates. The BPI AMTC weighted average earnings growth for 1Q was at 6%. Moreover, the congress finally passed House Bill 5636 or Package 1 of the Comprehensive Tax Reform Program with 246 members voting for, versus only nine voting against and one abstention. This absolutely boosted market sentiment and market players now await for further development as the bill progresses to the Senate deliberations which will start in July.

In terms of net foreign position, foreign buying dominated the market in May, registering US\$ 173 million pushing the YTD figure back to the positive territory at US\$10.8 million.

Top index gainers for the month include PCOR (+20.53%), MEG (+15.76%), and SMPH (+13.09%). Meanwhile, worst performing index names were FGEN (-11.72%), AP (-7.65%), and URC (-5.81%).

Fund Performance. The fund rose by 1.26% in May, beating its benchmark by 2 basis points. It underperforms the benchmark on a year-to-date basis by 16 basis points with a return of 7.36%.

Fund Strategy. We remain netural in equities and take profits as we hover around the 8,000 level. We will still be opportunistic and nimble on issues that might benefit in the upcoming FTSE rebalancing. Buy on undervalued and laggard names and take profit on outperformers.
