## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange Index (PSEi) broke out for the month of the September on the back of strong bargain-hunting by local market players. The bellweather index surged 2.7% to 8,171.43 to go along with high volume of Php7.53 billion average daily turnover. A slew of market moving news also prompted the strong market movement including the progress of the Comprehensive Tax Reform Program Package 1 where the Senate Ways and Means Committee filed its own version called Senate Bill 1592 having notable differences from the first version constructed by the House of Representatives. Another one is the effect of the EDC tender offer that generated massive liquidity in the market as well as the decrease in its public float and therefore got deleted in PSEi, MSCI and FTSE. For the month, foreigners were actually net sellers ex-EDC tender offer at US\$68 million.

Top gainers for the month were AGI (+15.40%), FGEN (+12.49%) and RRHI (+9.09%) while detractors include BPI (-6.09%), TEL (-3.58%), and SECB (-2.72%).

Key Economic Developments:

- The Bangko Sentral ng Pilipinas (BSP) has kept policy rates steady and maintained inflation forecasts. Borrowing rates were unchanged at 3.5% for overnight lending and 3% for overnight reverse repurchase while 2.5% for overnight deposit. Inflation kept its inflation target at 2-4%.
- Gross international reserves went up to US\$81.51 billion in August or 0.6% higher month-on-month on the back of revaluation of gold as gold prices went up.
- OFW remittances soared 7.1% YoY to US\$2.28bn in July, pushing the 7M2017 figure to US\$16.1 billion.

**Fund Performance.** The fund rose by 1.58% in September, beating its benchmark by 16 basis points. It underperforms the benchmark on a year-to-date basis by 35 basis points with a return of 9.83%.

**Fund Strategy.** Given the record-highs of the PSEi, expectations of a sustained economic growth, steady corporate earnings expansion and coupled with the fact that global growth has been gaining traction, we will be strategically weighted on equities for the next 12 months. We will also be nimble in taking advantage of opportunities especially buying on market dips when slowly adding position on equities.
