

BPI Global Philippine Fund

A Unit Investment Trust Fund of the Bank of the Philippine Islands

Investment Objective

The Fund aims to achieve capital appreciation and income by investing in a diversified portfolio of foreign currency-denominated fixed income instruments issued by the Philippine government and by Philippine corporations and financial institutions. The Fund aims to provide excess return over the composite benchmark, 50% return of the 3-month U.S. Treasury Bill and 50% JP Morgan Asia Credit Philippines Total Return Index.

Available Through	BPI Branches and www.bpiexpressonline.com
Trustee	Bank of the Philippine Islands
Third Party Custodian	HSBC, Ltd. (Philippines)
Dealing Cut-Off	12:00 PM

Manager's Report

Market Review. Philippine dollar-denominated bond prices rose for the month as yields declined by an average of 2 basis points. The market experienced much volatility as investors digested economic releases from China, as well as comments from the US Federal Reserve (the Fed).

China released its economic growth target of 7.5% for 2014, matching the 2013 goal, the lowest since 1990. March also marked the first meeting of the US Federal Reserve (the Fed) with Janet Yellen at Chairperson, and as expected the target rate was maintained but bond purchases (QE3) were further reduced by US\$10 billion. The Fed likewise revised its forward guidance, disassociating itself from a specific level of unemployment. In another speech during the month, Yellen emphasized that interest rates would remain low for a considerable period of time even after the end of the central bank's asset purchases.

On the local front, Philippine fundamentals continued to support yields as fiscal management remained sound and external positions healthy. The budget deficit for January came in at PHP34.2 billion, 75% higher year-on-year. Gross international reserves increased by US\$800 million to US\$80.3 billion, representing 11.5 months' worth of imports.

Fund Performance. The Fund has returned 1.56% for the year, underperforming its benchmark by 34 basis points.

Strategy. The duration of the Fund as of month-end was at 2.94, lower than the previous month's 2.96. Moving forward, we look to maintain the Fund's underweight duration in light of the continued reduction in stimulus by the US Federal Reserve.

Portfolio Weightings

Maturity Profile

Any prospective investment shall be limited to the type of investments described in the Declaration of Trust for the Fund.

Average Credit Rating: Baa3 (Moody's) / BBB- (S&P)

Risk Disclosure

The Fund is suitable for investors with at least a moderately conservative profile. The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. The Fund's net asset value, and total return may fluctuate as a result of interest rate and currency movements and the changes in the credit quality of the investments. On redemption of units, an investor may receive an amount less than the original amount of investment. Liquidity risk also needs to be taken into account.

Risk Management

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVPU to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more NAVPU will fluctuate in relation to changes in interest rates. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

¹Returns are net of fees. Past performance is not an indication of future returns.

²The Benchmark of the Fund is a composite of 50% 3-month U.S. Treasury Bill and 50% JP Morgan Asia Credit Philippines Total Return Index. The Fund adopted the Benchmark on July 1, 2011. The previous Benchmark of the Fund is the 3-month U.S. Treasury Bill.

³Average daily NAV for the past 3 months

⁴The Information Ratio evaluates reward-to-risk efficiency relative to the benchmark, while the Sharpe Ratio evaluates reward-to-risk efficiency relative to the risk free rate. The higher the number, the higher the reward per unit of risk. Sharpe and Information Ratios between funds of different classifications are non-comparable.

⁵Trust fee/custodianship fee as a percentage of average daily NAV for the quarter

⁶External Audit fees as a percentage of 2013 end-year NAV

⁷Net of Tax
