

BPI Global Philippine Fund A Unit Investment Trust Fund of the Bank of the Philippine Islands

Investment Objective

The Fund aims to achieve capital appreciation and income by investing in a diversified portfolio of foreign currency-denominated fixed income instruments issued by the Philippine government and by Philippine corporations and financial institutions. The Fund aims to provide excess return over the composite benchmark, 50% return of the 3-month U.S. Treasury Bill and 50% JP Morgan Asia Credit Philippines Total Return Index.

External Auditor	Isla Lipana & Co.
Available Through	BPI Branches and www.bpiexpressonline.com
Trustee	Bank of the Philippine Islands
Third Party Custodian	HSBC, Ltd. (Philippines)
Dealing Cut-Off	12:00 PM

Manager's Report

Market Review. The J.P. Morgan Chase Asia Total Return Philippine Bond Index (JACI) gained 1.95% in October. Philippine sovereign bonds reversed the previous month's losses, rising by an average of 1.83 points during the month. On a year-to-date basis, the JACI has returned 9.64%. ROP prices tracked US Treasuries as demand for safe-haven assets grew stronger amid negative growth sentiments in other advanced economies. During the month, the ten-year US Treasury yield eased by 15 basis points to close at 2.34%.

The US Federal Reserve concluded its bond purchase program at the end of October. Though it maintained its position in keeping policy rates near zero for a considerable time, a more hawkish tone was adopted when it upgraded its assessment of labor market conditions and the broader US economy. Policymakers likewise noted that the underutilization of labor resources was gradually diminishing.

The US economy expanded by 3.5% in the third quarter, largely driven by a 7.8% growth in exports. Though the GDP figure was higher than market consensus of 3%, it was lower still than the 4.6% GDP print for the previous quarter. Budget deficit at the end of its fiscal year in September fell by 29% to \$483.35 billion, equivalent to 2.8% of US GDP.

Meanwhile, the Bank of Japan increased its asset purchase program and vowed to continue its policies to bring inflation up to 2%. It will raise its purchases of government bonds to ¥80 trillion from ¥50 trillion, and triple its buying of exchange-traded-funds to ¥3 trillion.

The Bangko Sentral ng Pilipinas kept the monetary policy unchanged for the first time since February. During its meeting in October, the overnight borrowing rate was kept at 4%, while the reserve requirement ratio and special deposit account rates were maintained at 20% and 2.5% for all tenors, respectively.

Fund Performance. The Fund has returned 4.23% for the year, underperforming its benchmark by 50 basis points.

Strategy. The duration of the Fund as of month-end was at 2.80, lower than the previous month's 3.30. Moving forward, we look to maintain the Fund's underweight duration in light of the continued reduction in stimulus by the US Federal Reserve.

Portfolio Weightings

Maturity Profile

Any prospective investment shall be limited to the type of investments described in the Declaration of Trust for the Fund.

Average Credit Rating: Baa3 (Moody's) / BBB (S&P)

Risk Disclosure

The Fund is suitable for investors with at least a moderately conservative profile. The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. The Fund's net asset value, and total return may fluctuate as a result of interest rate and currency movements and the changes in the credit quality of the investments. On redemption of units, an investor may receive an amount less than the original amount of investment. Liquidity risk also needs to be taken into account.

Risk Management

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVPU to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more NAVPU will fluctuate in relation to changes in interest rates. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

¹Returns are net of fees. Past performance is not an indication of future returns.

²The Benchmark of the Fund is a composite of 50% 3-month U.S. Treasury Bill and 50% JP Morgan Asia Credit Philippines Total Return Index. The Fund adopted the Benchmark on July 1, 2011. The previous Benchmark of the Fund is the 3-month U.S. Treasury Bill.

³Average daily NAV for the past 3 months

⁴The Information Ratio evaluates reward-to-risk efficiency relative to the benchmark, while the Sharpe Ratio evaluates reward-to-risk efficiency relative to the risk free rate. The higher the number, the higher the reward per unit of risk. Sharpe and Information Ratios between funds of different classifications are non-comparable.

⁵Trust fee fee as a percentage of average daily NAV for the quarter

⁶Calculated based on the total billings received in 2013 divided by the average daily NAV in 2013

⁷Net of Tax
