## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index marginally rose by 0.61% in April even as yields rose by 23 basis points on average. Similar to the month of March, peso-denominated government bonds were not very actively traded as average daily volume trade fell to Php6.51 billion. Trades were mostly seen on the the 5-year RTB5-11, the 2-year RTB3-8 and various Treasury Bills.

The Bureau of the Treasury's four FXTN auctions of during the month saw moderate demand as investors remained cautious amid expectations of rising interest rates globally, and talks of impending supply. Only two of the auctions were fully awarded, with the 3-year (FXTN3-23 reissuance) and 10-year (FXTN10-63 reissuance) papers yielding 4.632% and 6.213% on average, respectively. Both issues were oversubscribed, though bids were higher than in prior auctions of similar tenors.

The other two auctions, a new 7-year (FXTN7-61) issuance and a 20-year reissuance (FXTN20-22), were only partially awarded by the government. Demand was quite strong as both papers were nearly twice oversubscribed. However, had the papers been fully awarded, yields would have gone up significantly for both tenors.

Inflation for the month of March came in at 4.3% (using 2012 as the base year), much higher than the figure posted in February. The increase in consumer prices continued to be driven by rising costs in food, drinks and tobacco. While the figure exceeded the central bank's targeted range of 2-4% for the year, the Bangko Sentral ng Pilipinas assured investors that they would vigilantly monitor the data so as to determine the appropriate monetary policy response.

**Fund Performance.** The Fund underperformed its benchmark by 52 bps in April.

**Fund Strategy.** The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
