## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index fell by 0.31% in October as yields rose by an average of 6 basis points, with most of the drop seen on the belly and long end of the curve. Compared to the month of September, peso-denominated government bonds were less actively traded with an average daily volume of Php7.11 Bn. Trades were mostly seen on the liquid securities such as the 3-year RTB 3-8, 4-year FXTN 5-74, and 8-year FXTN 10-60.

The Bureau of the Treasury (BTr) held two FXTN re-issuances in October. Strong demand was seen during the first auction, which was a re-issuance of FXTN 5-74. The 4-year paper was awarded at an average yield of 3.979%, which was lower than the previous auction's 4.226%. The government fully awarded the Php15 billion offer of the 4-year paper, as the total bids amounted to Php29.95 billion. The re-issuance of the 7-year FXTN 7-59 likewise showed a healthy demand, being almost twice oversubscribed. The 7-year paper was fully awarded with an average yield of 4.390%, which was slightly lower than the previous auction's 4.395%.

The local inflation print came in at 3.4% YoY in September, which was higher than expectations at 3.2%. The inflation figure, was mainly driven by price pressures on energy, food and non-alcoholic beverages. Despite beating expectations, inflation print was well within the BSP's target range of 2% to 4%. Last October 18, BSP Governor Nestor Espenilla reiterated at the Philippine Business conference that the current policy settings are appropriate.

**Fund Performance.** The Fund outperformed its benchmark by 16 bps in October.

**Fund Strategy.** The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
