INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve investment returns that closely track the total return of a U.S. dollar-denominated index, the JP Morgan Asia Credit Philippines Total Return Index, before fees and taxes, by investing in a diversified portfolio of Philippine sovereign and corporate fixed income instruments.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Philippine Dollar Bond Index Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines gained 1.07% in January as Philippine dollar-denominated bond yields moved lower across the yield curve by an average of 4.4 basis points.

For the month of January, movements in global bond markets were driven by various economic data releases, statements from key members of the US Federal Reserve, and the inaugural speech as well as a series of executive orders from newly-elected US President Donald Trump. US non-farm payrolls last December were slightly lower than consensus expectations at 156,000 (market estimate of 178,000). However, average wages grew by 2.9% annually, the fastest pick-up in seven years. Meanwhile, speeches from various Federal Reserve members earlier during the month indicated support for up to two to three rate hikes in 2017. Hawkish rhetoric, combined with the strong wage growth, caused US Treasury yields to rise from the YTD low of 2.33%. Optimism that President Trump's executive orders were in partial fulfillment of his campaign promises on trade and immigration likewise drove preference for equities over US Treasuries.

On the local front, the country's 4Q16 GDP growth registered at +6.6%, bringing the full-year growth figure to meet the consensus estimate of +6.8%. Inflation remained benign at 2.6% last December. The country's strong fundamentals provided support for RoPs, resulting in a monthly gain.

During the month, the Philippine government successfully issued US\$2 billion worth of 25-year RoPs, maturing February 2042 with a coupon rate of 3.7%. The issuance coincided with the US\$500 million RoP17 maturity. The government was able to swap US\$1.5 billion worth of high coupon or short maturity RoPs for the longer duration RoP42. Moreover, the government was able to fill its planned US\$500 million of new money for the 2017 spending program.

Fund Performance. The fund returned 1.13% for the month, outperforming its benchmark by 6 basis points.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
