INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve investment returns that closely track the total return of a U.S. dollar-denominated index, the JP Morgan Asia Credit Philippines Total Return Index, before fees and taxes, by investing in a diversified portfolio of Philippine sovereign and corporate fixed income instruments.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Philippine Dollar Bond Index Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines gained 0.40% in July even as Philippine dollar-denominated bond yields moved higher across the yield curve by an average of 0.41 basis points, mostly on the short-end of the curve. Yields on the medium-tenored RoPs maturing 2024, 2030 and 2032, however, fell by an average of 6.5 basis points.

Despite the market volatility seen earlier during the month, bond prices were well-supported in July as investors digested dovishness from US Federal Reserve (Fed) Chair Janet Yellen during her testimony to Congress, coupled with mostly disappointing US consumer-related economic data. Meetings held by three of the major central banks globally added to the dovish sentiment as both the Bank of Japan and the European Central Bank signaled to markets that the era of ultra-easy monetary policy would continue for the time being. Meanwhile, the Federal Open Market Committee continued to assure markets of a gradual pace of rate hikes while simultaneously mentioning that it might soon begin to unwind its massive balance sheet. US Treasury gains made from the earlier dovish comments were thus somewhat capped by the implications of a Fed balance sheet wind-down. As a result, the US 10-year Treasury benchmark yield ended the month at the 2.2960% level.

Local inflation for the month of June eased to a five-month low of 2.7%, slower than the 3.1% registered in May. The slowdown was in line with market expectations and still within the BSP's targeted range of 2-4% for 2017. Data released during the month showed that the Philippine government's infrastructure spending posted a yearly increase of 11.4% in June, which brought the 2Q17 infrastructure spending to a 5.9% YoY growth. While the growth figure was higher than that of 1Q17's, the government must spend roughly Php312 billion more to meet the 2017 target of Php550 billion (3.5% of GDP). Manageable inflation and continued robust economic growth should allow the BSP to keep its policy rates accommodative.

Fund Performance. The fund returned 0.43% for the month, outperforming its benchmark by 3 basis points.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
