

Philippine Dollar Bond Index Fund

A Unit Investment Trust Fund of the Bank of the Philippine Islands

Investment Objective

The Fund aims to achieve investment returns that closely track the total return of a U.S. dollar-denominated index, the JP Morgan Asia Credit Philippines Total Return Index, before fees and taxes, by investing in a diversified portfolio of Philippine sovereign and corporate fixed income instruments.

Maturity Profile

Any prospective investment shall be limited to the type of investments described in the Declaration of Trust for the Fund.

Average Credit Rating: Ba1 (Moody's) / BB (S&P)

Risk Disclosure

The fund is suitable for investors with an aggressive risk profile. An index tracker bond fund is suitable for investors who take medium to long-term views and want exposure to Philippine bonds. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. As a marked-to-market UITF, the Fund's yield, net asset value, and total return may fall as well as rise as a result of interest rate movements and the changes in credit quality of the investments. On redemption of units, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

⁴Tracking error is the measure of deviation between the Fund's returns and the benchmark returns. A lower number means the Fund's return is closely aligned with the benchmark.

⁵Trust fees/management fees/custodianship fees as a percentage of average daily NAV for the quarter.

⁶External Audit fees as a percentage of end-year NAV.

⁷For publication expense.

Manager's Report

Market Review. Last January, Philippine dollar-denominated bonds succumbed to selling pressure as ROPs tracked the movement of US Treasuries. For the month, ROP bond prices decreased by an average of 2.3%. Prices on longer-tenored bonds were the most affected, declining by as much as 5.69% month-on-month.

This decline occurred in spite of the country's strong macroeconomic fundamentals. The fourth quarter GDP figure came in at 6.8%, which was higher than the market expectation of a 6.4% growth rate. Moreover, this brought the full-year 2012 GDP figure to 6.6% and placed the Philippines as the second best-performing economy in the Asian region, second only to China.

On a similar sentiment, the CPI figure for the month of January clocked in at 3%, rising slightly over December's 2.9% but still at the lower range of the government's 3-5% full-year target. This further strengthens our view that inflation will remain benign for months to come.

Fund Performance. Against this backdrop, the Fund returned -2.05% for the month.

Strategy. The Fund will continue to track the JPMorgan Asia Credit Total Return Index.
