

### Investment Objective

The Fund aims to achieve investment returns that closely track the total return of a U.S. dollar-denominated index, the JP Morgan Asia Credit Philippines Total Return Index, before fees and taxes, by investing in a diversified portfolio of Philippine sovereign and corporate fixed income instruments.

### Figures as of 10/31/2011

#### Cumulative Performance (%)<sup>1</sup>

	1 mo	1YR	3YRS	4YRS
Fund	3.57	4.43	63.67	45.52
Benchmark <sup>2</sup>	3.75	4.83	62.73	47.29

#### Annualized Performance (%)<sup>1</sup>

	1YR	2YRS	3YRS	4YRS
Fund	4.43	11.89	17.85	9.83
Benchmark <sup>2</sup>	4.83	12.13	17.62	10.16

#### Calendar Year Performance (%)<sup>1</sup>

	YTD	2010	2009	2008	2007
Fund	8.09	13.34	20.41	-2.70	7.20
Benchmark <sup>2</sup>	8.44	13.76	24.38	-5.43	7.59

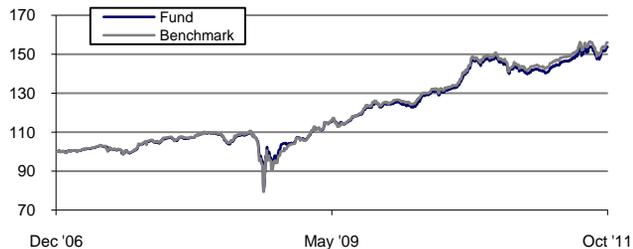

<sup>1</sup>Returns are net of fees. Past performance is not an indication of future returns.

<sup>2</sup>The Benchmark of the fund is the JP Morgan Asia Credit Philippines Total Return Index.

### Maturity Profile

Average Credit Rating: Ba2 (Moody's) / BB (S&P)

### Risk Disclosure

The fund is suitable for investors with an aggressive risk profile. An index tracker bond fund is suitable for investors who take medium to long-term views and want exposure to Philippine bonds. As a marked-to-market UITF, the Fund's yield, net asset value, and total return may fall as well as rise as a result of interest rate movements and the changes in credit quality of the investments. On redemption of units, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

<sup>3</sup>Duration measures the sensitivity of NAVPU to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more NAVPU will fluctuate in relation to changes in interest rates.

<sup>4</sup>Volatility measures the fluctuations in NAVPU. The higher the number, the higher the potential gain or loss.

<sup>5</sup>Tracking error is the measure of deviation between the Fund's returns and the benchmark returns. A lower number means the Fund's return is closely aligned with the benchmark.

<sup>6</sup>Contribution rounded down / redemption rounded off to the nearest whole unit.

<sup>7</sup>Trust fees paid for the quarter as a percentage of average daily NAV for the quarter.

<sup>8</sup>Custodianship fees billed for the quarter as a percentage of average daily NAV for the quarter.

<sup>9</sup>External Audit fees as a percentage of end-year 2009 NAV.

<sup>10</sup>For publication expense.

### Manager's Report

**Monthly Commentary.** Philippine dollar-denominated bond prices recovered in October from the previous month's sell-off, with prices rising 2.50% and ROP yields declining by 41 basis points on average. All markets were focused on Europe as developments in the region's sovereign debt drama continued to unravel. Risk-on sentiment prevailed in the markets once again as European nations came to an agreement on several key issues, including a 50% haircut on Greek debt held by the private sector, recapitalization of banks across the continent and the expansion of the European Financial Stability Facility (ESFS) from EUR440bn to EUR1Tn (equivalent to USD1.4Tn). Investors found extra comfort from news that China and the International Monetary Fund (IMF) could also be tapped for the rescue efforts needed for Greece.

US Treasuries on the other hand, were sold off as demand for safe haven debt waned, causing US benchmark yields to increase, particularly in the long end of the curve. The 30-year US Treasury bond yield increased by 21 bps after moving back up above the 3.0% level, settling at 3.13% as of month-end.

Overseas remittances were reported at USD1.7Bn in August, 11.1% higher than the USD1.5Bn remitted over the same period last year. OFW remittance flows have proven to be resilient this year and will continue to add support to ROP bond prices. Another possible driver for ROP price appreciation is the ROP buyback program conducted by the Philippine government. The government agreed to buy back USD1.3Bn (principal amount) of ROP bonds under the exercise, which drew in USD2.2Bn in offers. The cash amount to be paid by the Philippines is expected to be around USD1.7Bn, and is expected to effectively lower the country's foreign debt-servicing costs.

**Fund Performance.** Against this backdrop, the Fund returned 8.09% year-to-date. The Fund continues to track the JPMorgan Asia Credit Total Return index.
