

#### Investment Objective

The Fund aims to achieve investment returns that closely track the total return of a U.S. dollar-denominated index, the JP Morgan Asia Credit Philippines Total Return Index, before fees and taxes, by investing in a diversified portfolio of Philippine sovereign and corporate fixed income instruments.

#### Maturity Profile

Any prospective investment shall be limited to the type of investments described in the Declaration of Trust for the Fund.

**Average Credit Rating:** Baa3 (Moody's) / BBB- (S&P)

#### Risk Disclosure

The Fund is suitable for investors with an aggressive risk profile. An index tracker bond fund is suitable for investors who take medium- to long-term views and want exposure to Philippine bonds. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. As a marked-to-market UITF, the Fund's yield, net asset value, and total return may fluctuate as a result of interest rate and currency movements and the changes in the credit quality of the investments. On redemption of units, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

<sup>4</sup> Average Daily NAV for the past 3 months.

<sup>5</sup> Tracking error is the measure of deviation between the Fund's returns and the benchmark returns. A lower number means the Fund's return is closely aligned with the benchmark.

<sup>6</sup> Trust fees/custodianship fees as a percentage of average daily NAV for the quarter.

<sup>7</sup> External Audit fees as a percentage of 2012 end-year NAV.

\*Plan rules are available upon request.

#### Manager's Report

**Market Review.** For the month of November, dollar denominated bonds corrected, with ROP prices declining by 1.67% on the average. Investors continued to look toward the release of the US November Non-Farm Payrolls (NFP) Report and the Unemployment Rate, especially as most market players took October's strong labor data to mean that a December tapering by the Federal Reserve was not yet off the table. At the last trading day of the month, the NFP figure came out at 203,000 versus the expected 185,000, while the US unemployment rate fell from 7.3% to 7.0%. The stronger-than-expected US labor market data sparked a sell-down in US Treasuries, causing the 10-year US Treasury bond yield to rise to 2.88%. Since ROPs have been tracking the movement in US Treasuries, investors should expect volatility to persist moving forward.

On a positive note, the Philippines continued to exhibit strong economic growth as the 3rd Quarter GDP figure came in at 7% despite the expected slowdown in government spending. The current administration is also keeping their finances in check as the budget deficit for the first 10 months of the year amounted to only Php112.50 billion, which is not even half of the government's Php242.1 billion ceiling for the entire year. Although November's CPI figure came out higher at 3.3% versus the previous month's 2.9%, the sudden spike in inflation was mostly expected due to the possible food price shocks in the aftermath of Super Typhoon Yolanda.

**Fund Performance.** Against this backdrop, the Fund has returned -5.30% year-to-date.

**Strategy.** The Fund will continue to track the JPMorgan Asia Credit Total Return Index.
